The Science of the Total Environment 156 (1994) 277–280

the Science of the Total Environment

Subject index

Volume 156 (1994)

Accumulation; Cadmium; Crustacean; Sewage sludge; Sediment; Bioavailability **156**, 191

Additives; Environmental health; Lubricants; Confidentiality **156**, 243

Adsorption-desorption; Cadusafos; Movement; Dissipation; Tropical conditions; Banana fields **156**, 1

Air quality; Tropospheric ozone; Photochemical processes; Mountainous regions **156**, 169

Aluminium smelter; Polycyclic aromatic hydrocarbons; PAH; Multivariate analysis; Flux **156**, 109

Amazon river; Humic compounds; Ultrafiltration **156**, 207

Banana fields; Cadusafos; Movement; Dissipation; Adsorption-desorption; Tropical conditions **156**, 1

Beef; Dioxin; Food chain; Modelling; Furan **156**, 39

Bioassay-directed fractionation; Polycyclic aromatic hydrocarbons; Sydney Harbour; Marine sediments; Genotoxicity; *Salmonella typhimurium* **156**, 119

Bioavailability; Cadmium; Crustacean; Sewage sludge; Sediment; Accumulation **156**, 191

Biosphere model; Nuclear waste; Waste disposal; Critical group; Environmental assessment **156**, 217

Cadmium; Crustacean; Sewage sludge; Sediment; Bioavailability; Accumulation **156**, 191

Cadmium; Environmental pollution; Food chain; Health risks; General population **156**, 151

Cadusafos; Movement; Dissipation; Adsorption-desorption; Tropical conditions; Banana fields **156**, 1

Confidentiality; Environmental health; Lubricants; Additives **156**, 243

Cosmetic directive; Cosmetics; Dichloromethane; 1,1,1-trichloroethane **156**, 23

Cosmetics; Dichloromethane; 1,1,1-trichloroethane; Cosmetic directive **156**, 23

Critical group; Biosphere model; Nuclear waste; Waste disposal; Environmental assessment **156**, 217

Crustacean; Cadmium; Sewage sludge; Sediment; Bioavailability; Accumulation **156**, 191

Cyanide; Wastewater treatment; Sources; Speciation; Toxicity; Fate; Inhibition; Sewage sludge **156**, 93

Daily intake; Mercury; Marine organisms; Tarragona Province **156**, 269

Degradation; Phenanthrene; Pyrene; Polycyclic aromatic hydrocarbon; Microorganisms; Seawater; Sediment; Environment; PAH **156**, 27

Dental pathology; Lead; Tooth **156**, 145

Dichloromethane; Cosmetics; 1,1,1-trichloroethane; Cosmetic directive **156**, 23

Dioxin; Food chain; Modelling; Furan; Beef **156**, 39

Dioxins; Oils; Waste; Disposal; Legislation **156**, 255

Disposal; Oils; Waste; Dioxins; Legislation **156**, 255

Dissipation; Cadusafos; Movement; Adsorption-desorption; Tropical conditions; Banana fields **156**, 1

Dry cleaning; Perchloroethylene; Indoor air **156**, 133

Environment; Phenanthrene; Pyrene; Degradation; Polycyclic aromatic hydrocarbon; Microorganisms; Seawater; Sediment; PAH **156**, 27

Environmental assessment; Biosphere model; Nuclear waste; Waste disposal; Critical group **156**, 217

Environmental health; Lubricants; Additives; Confidentiality **156**, 243

Environmental pollution; Cadmium; Food chain; Health risks; General population **156**, 151

Exchanges; Lagoons; Nutrients; Inputs **156**, 77

Fate; Cyanide; Wastewater treatment; Sources; Speciation; Toxicity; Inhibition; Sewage sludge **156**, 93

Fenvalerate; Solid-phase extraction; Metazachlor; Pond water **156**, 67

Flux; Polycyclic aromatic hydrocarbons; PAH; Aluminium smelter; Multivariate analysis **156**, 109

Food chain; Cadmium; Environmental pollution; Health risks; General population **156**, 151

Food chain; Dioxin; Modelling; Furan; Beef **156**, 39

Furan; Dioxin; Food chain; Modelling; Beef **156**, 39

Gas chromatography; Pesticides; Soil analysis; Solid-phase extraction disk **156**, 199

General population; Cadmium; Environmental pollution; Food chain; Health risks **156**, 151

Genotoxicity; Polycyclic aromatic hydrocarbons; Sydney Harbour; Bioassay-directed fractionation; Marine sediments; *Salmonella typhimurium* **156**, 119

Greece; Pesticide residues; Transportation; River estuaries **156**, 11

Health risks; Cadmium; Environmental pollution; Food chain; General population **156**, 151

Human head hair, Trace elements; Smoking **156**, 235

Humic compounds, Ultrafiltration; Amazon river **156**, 207

In vitro cytotoxicity; Packaged water; l-929 fbroblasts; *Tetrahymena pyriformis* GL **156**, 159

Indoor air; Perchloroethylene; Dry cleaning **156**, 133

Inhibition; Cyanide; Wastewater treatment; Sources; Speciation; Toxicity; Fate; Sewage sludge **156**, 93

Inputs; Lagoons; Nutrients; Exchanges **156**, 77

l-929 fbroblasts; Packaged water; In vitro cytotoxicity; *Tetrahymena pyriformis* GL **156**, 159

Lagoons; Nutrients; Inputs; Exchanges **156**, 77

Laser desorption time-of-flight mass spectrometry; Metabolic intermediates; Microbial degradation **156**, 139

Lead; Tooth; Dental pathology **156**, 145

Legislation; Oils; Waste; Dioxins; Disposal **156**, 255

Lubricants; Environmental health; Additives; Confidentiality **156**, 243

Marine organisms; Mercury; Daily intake; Tarragona Province **156**, 269

Marine sediments; Polycyclic aromatic hydrocarbons; Sydney Harbour; Bioassay-directed fractionation; Genotoxicity; *Salmonella typhimurium* **156**, 119

Mercury; Marine organisms; Daily intake; Tarragona Province **156**, 269

Metabolic intermediates; Microbial degradation; Laser desorption time-of-flight mass spectrometry **156**, 139

Metazachlor; Solid-phase extraction; Fenvalerate; Pond water **156**, 67

Microbial degradation; Metabolic intermediates; Laser desorption time-of-flight mass spectrometry **156**, 139

Microorganisms; Phenanthrene; Pyrene; Degradation; Polycyclic aromatic hydrocarbon; Seawater; Sediment; Environment; PAH **156**, 27

Modelling; Dioxin; Food chain; Furan; Beef **156**, 39

Mountainous regions; Tropospheric ozone; Air quality; Photochemical processes **156**, 169

Movement; Cadusafos; Dissipation; Adsorption-desorption; Tropical conditions; Banana fields **156**, 1

Multivariate analysis; Polycyclic aromatic hydrocarbons; PAH; Aluminium smelter; Flux **156**, 109

Nuclear waste; Biosphere model; Waste disposal; Critical group; Environmental assessment **156**, 217

Nutrients; Lagoons; Inputs; Exchanges **156**, 77

Oils; Waste; Dioxins; Disposal; Legislation **156**, 255

Packaged water; In vitro cytotoxicity; l-929 fbroblasts; *Tetrahymena pyriformis* GL **156**, 159

PAH; Phenanthrene; Pyrene; Degradation; Polycyclic aromatic hydrocarbon; Microorganisms; Seawater; Sediment; Environment **156**, 27

PAH; Polycyclic aromatic hydrocarbons; Aluminium smelter; Multivariate analysis; Flux **156**, 109

Perchloroethylene; Dry cleaning; Indoor air **156**, 133

Pesticide residues; Transportation; River estuaries; Greece **156**, 11

Pesticides; Soil analysis; Solid-phase extraction disk; Gas chromatography **156**, 199

Phenanthrene; Pyrene; Degradation; Polycyclic aromatic hydrocarbon; Microorganisms; Seawater; Sediment; Environment; PAH **156**, 27

Photochemical processes; Tropospheric ozone; Air quality; Mountainous regions **156**, 169

Polycyclic aromatic hydrocarbon; Phenanthrene; Pyrene; Degradation; Microorganisms; Seawater; Sediment; Environment; PAH **156**, 27

Polycyclic aromatic hydrocarbons; PAH; Aluminium smelter; Multivariate analysis; Flux **156**, 109

Polycyclic aromatic hydrocarbons; Sydney Harbour; Bioassay-directed fractionation; Marine sediments; Genotoxicity; *Salmonella typhimurium* **156**, 119

Pond water; Solid-phase extraction; Fenvalerate; Metazachlor **156**, 67

Pyrene; Phenanthrene; Degradation; Polycyclic aromatic hydrocarbon; Microorganisms; Seawater; Sediment; Environment; PAH **156**, 27

River estuaries; Pesticide residues; Transportation; Greece **156**, 11

Salmonella typhimurium; Polycyclic aromatic hydrocarbons; Sydney Harbour; Bioassay-directed fractionation; Marine sediments; Genotoxicity **156**, 119

Seawater; Phenanthrene; Pyrene; Degradation; Polycyclic aromatic hydrocarbon; Microorganisms; Sediment; Environment; PAH **156**, 27

Sediment; Cadmium; Crustacean; Sewage sludge; Bioavailability; Accumulation **156**, 191

Sediment; Phenanthrene; Pyrene; Degradation; Polycyclic aromatic hydrocarbon; Microorganisms; Seawater; Environment; PAH **156**, 27

Sewage sludge; Cadmium; Crustacean; Sediment; Bioavailability; Accumulation **156**, 191

Sewage sludge; Cyanide; Wastewater treatment; Sources; Speciation; Toxicity; Fate; Inhibition **156**, 93

Smoking; Human head hair, Trace elements **156**, 235

Soil analysis; Pesticides; Solid-phase extraction disk; Gas chromatography **156**, 199

Soil properties; Total cadmium; Soluble cadmium; Spain **156**, 183

Solid-phase extraction; Fenvalerate; Metazachlor; Pond water **156**, 67

Solid-phase extraction disk; Pesticides; Soil analysis; Gas chromatography **156**, 199

Soluble cadmium; Total cadmium; Soil properties; Spain **156**, 183

Sources; Cyanide; Wastewater treatment; Speciation; Toxicity; Fate; Inhibition; Sewage sludge **156**, 93

Spain; Total cadmium; Soluble cadmium; Soil properties **156**, 183

Speciation; Cyanide; Wastewater treatment; Sources; Toxicity; Fate; Inhibition; Sewage sludge **156**, 93

Sydney Harbour; Polycyclic aromatic hydrocarbons; Bioassay-directed fractionation; Marine sediments; Genotoxicity; *Salmonella typhimurium* **156**, 119

Tarragona Province; Mercury; Marine organisms; Daily intake **156**, 269

Tetrahymena pyriformis GL; Packaged water; In vitro cytotoxicity; l-929 fbroblasts **156**, 159

Tooth; Lead; Dental pathology **156**, 145

Total cadmium; Soluble cadmium; Soil properties; Spain **156**, 183

Toxicity; Cyanide; Wastewater treatment; Sources; Speciation; Fate; Inhibition; Sewage sludge **156**, 93

Transportation; Pesticide residues; River estuaries; Greece **156**, 11

1,1,1-Trichloroethane; Cosmetics; Dichloromethane; Cosmetic directive **156**, 23

Tropical conditions; Cadusafos; Movement; Dissipation; Adsorption-desorption; Banana fields **156**, 1

Tropospheric ozone; Air quality; Photochemical processes; Mountainous regions **156**, 169

Waste; Oils; Dioxins; Disposal; Legislation **156**, 255

Waste disposal; Biosphere model; Nuclear waste; Critical group; Environmental assessment **156**, 217

Wastewater treatment; Cyanide; Sources; Speciation; Toxicity; Fate; Inhibition; Sewage sludge **156**, 93
